Gulf City Body & Trailer Works Expands Tractor Trailer Repair Services Across Louisiana

March 27, 2026

Mobile, Alabama - March 27, 2026 -
Gulf City Body & Trailer Works, Inc., a Mobile, Alabama-based trailer repair and maintenance facility with over 74 years of industry experience, has expanded its service coverage to better serve commercial trucking operations throughout Louisiana, Mississippi, Alabama, and Georgia. The company's strategic location adjacent to Interstate 10 positions it as a critical service provider for the region's growing transportation and logistics sector.

The expansion comes as demand for professional trailer repair services continues to rise across the Southeast, driven by increased freight movement and aging fleet infrastructure. Gulf City Body & Trailer Works operates from a 10-acre facility with 50,000 square feet of covered workspace, enabling the company to handle multiple large-scale repair projects simultaneously while maintaining quick turnaround times for operators needing tractor-trailer repairs in Alabama and neighboring states.

"The transportation industry across the Southeast faces unique challenges, from coastal weather conditions to the demands of long-haul routes connecting major ports and distribution centers," said Paul Averitt, Sales Manager at Gulf City Body & Trailer Works. "Our expanded service coverage ensures that fleet

operators and independent drivers throughout Louisiana, Mississippi, Alabama, and Georgia have access to comprehensive repair and maintenance services that keep their equipment running safely and efficiently."

Gulf City Body & Trailer Works provides full-service repair and maintenance for all makes and models of trailers, fuel tankers, and flatbeds. The company's trained mechanics continually upgrade their skills to work on today's complex trucks and trailers, offering specialized services including aluminum and stainless welding, steel fabrication, hydraulic work, wet line kit installation, and axle repair. This comprehensive approach allows the facility to address everything from routine maintenance to major structural repairs.

The company's expansion particularly benefits Louisiana-based trucking operations, which rely heavily on well-maintained equipment to navigate the state's extensive industrial corridor and port facilities. With Mobile's proximity to major Louisiana transportation hubs, Gulf City Body & Trailer Works can provide timely service to fleets operating across state lines while minimizing equipment downtime.

"Our commitment to quality service and getting repairs done right the first time has earned us the trust of operators throughout the region," added Averitt. "Whether a driver needs emergency roadside assistance coordination or a fleet manager requires scheduled maintenance for multiple units, we have the expertise and capacity to meet their needs."

Beyond repair services, Gulf City Body & Trailer Works maintains an extensive inventory of national and brand-name parts for trailers and tanks, along with new, used, and rental trailer options from trusted manufacturing partners. This comprehensive approach allows the company to serve as a single source for fleet maintenance, parts procurement, and equipment acquisition.

Gulf City Body & Trailer Works, Inc. has served the transportation industry for more than seven decades, establishing itself as a trusted partner for commercial trucking operations throughout the Southeast. The company maintains memberships in NTEA and NTTC, as well as the Alabama, Mississippi, and Florida Petroleum Associations, demonstrating its commitment to industry standards and best practices.
